

Support Fiscal Responsibility

New Hampshire is facing a number of budget challenges in the future including the \$100 million DCY settlement and reductions in tax receipts resulting from eliminating the Dividends and Interest taxes and reducing the Business and Enterprise Tax and Business Profits Tax. Our state pension system is also underfunded. The responsible thing to do is to identify new potential revenue sources and new spending cuts to cover these items. Growing our economy by recruiting new businesses to relocate to our state and identifying areas for savings in our state budget are some possibilities. Also, the cost of new regulations should be identified prior to passage and obsolete regulations eliminated from our laws.
