

## **Encourage Tough on Crime Policies**

We have a persistent and increasingly dangerous drug culture in New Hampshire. I think the state might benefit from increased penalties for recidivist drug users and drug dealers, particularly when there is an overdose death. I support truth in sentencing and ensuring criminals remain incarcerated for their full prison term. I would like New Hampshire to implement enhanced penalties for drug dealing, human trafficking and organized and gang crime. We should continue to discourage illegal alien migration to our state by requiring employers to vet prospective employees through E-Verify, a federal system that determines citizenship, and continuing to deny them access to public assistance programs, education, healthcare, and other services to be reserved for legal immigrants and citizens. We must stop the Democrat debasement of the value of United States Citizenship.
